

## Filters Puzzler: Can you tell which filter was used?

Image #1	Image #2	Image #3	Color Image
 A grayscale image of a sunflower field where the colors are inverted. The sunflowers appear as dark shapes against a light background, and the leaves and stems are also inverted, creating a high-contrast, negative-like effect.	 A grayscale image of a sunflower field. The image has been processed with a threshold filter, resulting in a binary appearance where the sunflowers and leaves are mostly white against a dark background, with some gray areas.	 A grayscale image of a sunflower field, similar to Image #2, showing a threshold effect. The sunflowers and leaves are predominantly white, with a dark background, though the distribution of white and dark areas differs slightly from Image #2.	 The original color image of a sunflower field. It shows a large yellow sunflower in the foreground, with other sunflowers and green leaves in the background under a clear blue sky.
